

Primary School Curriculum (Classes I–V)

At GD Goenka Public School, Unnao, the Primary School curriculum is thoughtfully designed to build a **strong academic foundation** while nurturing creativity, curiosity, and confidence in young learners. The curriculum follows the guidelines of the **Central Board of Secondary Education**, enriched with modern teaching methodologies and experiential learning practices.

Curriculum Overview

The primary years focus on developing literacy, numeracy, communication, and critical thinking skills. Equal emphasis is placed on academic excellence and holistic development, ensuring that every child grows intellectually, socially, emotionally, and physically.

Core Academic Subjects

Students are introduced to a balanced mix of subjects:

- **English** – Reading, writing, grammar, and communication skills
- **Hindi** – Language development and expression
- **Mathematics** – Conceptual understanding, logical reasoning, and problem-solving
- **Environmental Studies (EVS)** – Awareness of surroundings through observation and activities

(A third language such as Sanskrit/French is introduced in higher primary grades.)

Co-Curricular & Skill Development

To ensure all-round development, the curriculum includes:

- Art & Craft
- Music and Dance
- Physical Education & Sports
- General Awareness
- Life Skills Education
- **ICT** – Basic digital literacy and technology integration

These activities help students develop creativity, teamwork, leadership, and confidence.

Teaching Methodology

Our teaching approach is child-centric, interactive, and activity-based, focusing on:

- Experiential and project-based learning
- Group activities and collaborative learning
- Smart classrooms and digital tools
- Real-life application of concepts

This approach encourages independent thinking and problem-solving skills among students.

Assessment System

We follow a comprehensive evaluation system that includes:

- Class assessments
- Multiple Assessments
- Project-based evaluations
- Oral presentations and class participation
- Continuous feedback and improvement tracking

The aim is to assess not just academic performance but also overall growth and skill development.

Learning Outcomes

By the end of the primary stage, students:

- Develop strong reading, writing, and numeracy skills
- Build confidence in communication and expression
- Acquire critical thinking and problem-solving abilities
- Show growth in social, emotional, and ethical values
